DEATH OF DASTARDLY CRIME

Body of Harry Levine Found in Huckleberry Pasture, Mile and a Half From Farm—Autopsy Showed Unnatural Assault—Inquest Will Be Held Today—Farmhand Under Surveillance.

The finding of the body of Harry Levine, the 4 1/2-year-old boy who had been missing 12 days from the Witter farm in Hanover, on Tuesday morning, and the subsequent autopsy showed that there was foul play in connection with the case and that he had been unnaturally assaulted.

The assault evidently following the crime with death to cover his deed. The body was held in the town of Scotland over night, and today an inquest will be held by Coroner Bill of Windham county. Wetzick Bernard, the farmhand at the Witter place, is under surveillance.

Between nine and ten o'clock Tuesday morning, Peter Croft, aged 14, and Jeremiah Donnelly, aged 12, who had been spending much time in the search for the missing boy, started out on the double mission of picking huckleberries and at the same time looking for the boy. They were a mile and a half to the north of the Witter place where they were attracted to a clump of bushes and there they discovered a strong and disagreeable odor which, upon investigation, disclosed the naked body of the missing boy.

Beside him lay his clothes, consisting of pants and waist. It was on a hillside at a distance greater than the searchers had been looking for him, and in a secluded spot. The body was hurried to the nearest place and gave the information that the boy had been found, but in order to allow time for investigation, the body was kept from the family as long as possible. Coroner Brown of this city was notified and it was learned that the body was in Windham county. Dr. L. I. Mason of Willimantic, medical examiner for Scotland, was called, and about 12 o'clock he saw the body.
